

AMRUTAM

Jr. QA Engineer - Testing Assignment

Web + Android Exploratory & Functional Testing Report

Candidate	Nikhil Awasthi
Email	nikhilawasthi9@gmail.com
Contact	+91 7317262617
Test Window	27-29 August 2026
Platforms	Web Application + Amrutam Ayurveda Android App
Deliverables	Bug Report, Structured Test Cases, Evidence Appendix

11

Confirmed Defects

44

Test Cases

33

Passed

75%

Pass Rate

Note: Payment flow was tested only up to the payment stage. No real payment transaction was submitted.

1. Executive Summary

The assignment covered exploratory, functional, validation, negative and UI/UX testing across Amrutam's web and Android platforms. Testing focused on onboarding/login, doctor consultation, e-commerce, content/forum/bulletin, profile management and mobile-specific edge cases.

Metric	Web	Android	Total
Confirmed defects	6	5	11
Medium severity	3	5	8
Low severity	3	0	3
Executed test cases	23	21	44

2. Scope & Coverage

- User Onboarding: phone validation, OTP verification, resend behavior and authentication gates.
- Doctor Consultation: expert discovery, slot/date behavior, past-date protection and login requirement.
- E-commerce: search, product variants, quantity, cart persistence, checkout, coupon and address validation.
- Content & Community: homepage content quality, Forum comments/likes, Bulletin notifications and navigation.
- Profile: name validation, DOB, height/weight and profile-update behavior.
- Mobile Edge Cases: offline behavior, app restart, rapid taps, empty states and platform-specific validation.

3. Key Findings

- Web OTP resend can be triggered repeatedly without a cooldown/rate limit.
- Web profile name fields accept invalid numeric-only and whitespace-only values.
- Android search lacks a clear zero-results empty state.
- Android Forum displays an inconsistent like count on the latest newly posted comment.
- Android notifications remain unread after the linked content is opened.
- Android profile updates are blocked by a required State validation even though no State field is available.
- Android checkout accepts invalid PIN values such as 000000 and 111111.

Detailed structured test cases are included in the accompanying Excel workbook.

4. Bug Summary

ID	Platform	Title	Severity
WEB-001	Web	OTP can be resent repeatedly without cooldown/rate limit	Medium
WEB-002	Web	Incorrect grammar: 'It's offers' displayed in Ayurveda introduction	Low
WEB-003	Web	Incorrect wording: 'Register your self' displayed in Session Process	Low
WEB-004	Web	Spelling error: 'untill' displayed in follow-up section	Low
WEB-005	Web	First Name and Last Name accept numeric-only values	Medium
WEB-006	Web	First Name and Last Name accept whitespace-only input	Medium
MOB-001	Android	No 'No results found' feedback for invalid search query	Medium
MOB-002	Android	Latest newly posted comment incorrectly shows 1 like without user action	Medium
MOB-003	Android	Notification remains unread after opening linked thought	Medium
MOB-004	Android	Profile update blocked by required 'State' validation although State field is unavailable	Medium
MOB-005	Android	Address form accepts invalid PIN code values	Medium

5. Detailed Bug Reports - Web

WEB-001	OTP can be resent repeatedly without cooldown/rate limit
Platform / Module	Web / Login / OTP
Steps to Reproduce	1. Open Login page 2. Enter a valid 10-digit mobile number 3. Request OTP 4. On OTP screen, tap Resend OTP repeatedly within a few seconds
Expected Result	Resend OTP should be rate-limited with a cooldown/timer and repeated requests should be temporarily blocked.
Actual Result	Resend OTP can be triggered repeatedly with no cooldown. Each tap immediately sends a new OTP and shows 'OTP resent successfully!'.
Severity	Medium
Status	Reproduced
Evidence	Fig. 1 - Multiple OTP resend success toasts

WEB-002	Incorrect grammar: 'It's offers' displayed in Ayurveda introduction
Platform / Module	Web / Homepage / Content
Steps to Reproduce	1. Open amrutam.global 2. Scroll to 'Discover Ayurveda's Magic With Us' 3. Read the introduction text
Expected Result	Sentence should use grammatically correct wording, e.g. 'It offers a holistic approach...'
Actual Result	Text is displayed as 'It's offers a holistic approach...'
Severity	Low
Status	Reproduced
Evidence	Fig. 2 - 'It's offers' highlighted

WEB-003	Incorrect wording: 'Register your self' displayed in Session Process
Platform / Module	Web / Homepage / Content
Steps to Reproduce	1. Open homepage 2. Scroll to 'Session Process' 3. Check onboarding instruction
Expected Result	Instruction should read 'Register yourself at amrutam.global'.
Actual Result	Instruction is displayed as 'Register your self at amrutam.global'.
Severity	Low
Status	Reproduced
Evidence	Fig. 3 - 'Register your self' highlighted

WEB-004	Spelling error: 'untill' displayed in follow-up section
Platform / Module	Web / Homepage / Content
Steps to Reproduce	1. Open homepage 2. Scroll to 'Regular Follow-ups' 3. Read the support text
Expected Result	Text should use the correct spelling 'until'.
Actual Result	Text displays 'untill'.
Severity	Low
Status	Reproduced
Evidence	Fig. 4 - 'untill' highlighted

WEB-005	First Name and Last Name accept numeric-only values
Platform / Module	Web / Profile / Edit Profile
Steps to Reproduce	1. Login 2. Open Profile > Edit Profile 3. Enter numeric-only values in First Name and Last Name 4. Save the profile
Expected Result	Name fields should reject numeric-only values and show validation feedback.
Actual Result	Numeric-only values are accepted/saved in both name fields.
Severity	Medium
Status	Reproduced
Evidence	Fig. 5 - Numeric-only names accepted

WEB-006	First Name and Last Name accept whitespace-only input
Platform / Module	Web / Profile / Edit Profile
Steps to Reproduce	1. Login 2. Open Profile > Edit Profile 3. Enter only spaces in First Name and Last Name 4. Save the profile
Expected Result	Whitespace-only values should be rejected as empty/invalid input.
Actual Result	Profile saves successfully with blank-looking name fields containing only spaces.
Severity	Medium
Status	Reproduced
Evidence	Fig. 6 - Whitespace-only names saved

6. Detailed Bug Reports - Android

MOB-001	No 'No results found' feedback for invalid search query
Platform / Module	Android / Search
Steps to Reproduce	1. Open app search 2. Enter a non-existing query such as 'xyzabc123' or '@@@@' 3. Tap Search
Expected Result	A clear empty-state message such as 'No products found' should be displayed.
Actual Result	No result/empty-state feedback is shown; the generic Discover Amrutam screen remains, leaving the user unsure whether search executed.
Severity	Medium
Status	Reproduced
Evidence	Fig. 7 - Invalid query shows no empty-state; valid query returns products

MOB-002	Latest newly posted comment incorrectly shows 1 like without user action
Platform / Module	Android / Forum / Comments
Steps to Reproduce	1. Login 2. Open Forum > Thoughts 3. Add a new comment 4. Do not tap the heart/like icon 5. Observe the latest comment and compare after posting another comment
Expected Result	A newly posted comment should start at 0 likes until a user explicitly likes it.
Actual Result	The latest comment displays 1 like automatically; after another comment is posted, the earlier comment can display 0, indicating inconsistent like-state rendering/sync.
Severity	Medium
Status	Reproduced
Evidence	Fig. 8 - Latest comment shows 1 like while prior comments show 0

MOB-003	Notification remains unread after opening linked thought
Platform / Module	Android / Bulletin / Notifications
Steps to Reproduce	1. In Bulletin > Notifications, mark a notification as Unread 2. Tap 'View Thought' 3. Open the linked content 4. Return to Notifications and check status
Expected Result	Opening the linked content from the notification should mark the notification as Read.
Actual Result	Notification remains Unread after the linked thought is opened. It must be manually marked as Read.
Severity	Medium
Status	Reproduced twice
Evidence	No screenshot captured; behavior reproduced twice

MOB-004	Profile update blocked by required 'State' validation although State field is unavailable
Platform / Module	Android / Profile / Edit Profile
Steps to Reproduce	1. Login 2. Open Edit Profile 3. Update photo/profile details 4. Tap Update Profile
Expected Result	Profile should update successfully, or a required State field should be visible/editable to the user.
Actual Result	Update is blocked with 'State cannot be empty.' although the single Edit Profile screen provides no State field to fill.
Severity	Medium
Status	Reproduced
Evidence	Fig. 9 - 'State cannot be empty' with no State field

MOB-005	Address form accepts invalid PIN code values
Platform / Module	Android / Shop / Checkout / Address
Steps to Reproduce	1. Add a product to cart 2. Proceed to Checkout/Address 3. Enter invalid PIN code such as 000000 or 111111 4. Save/continue
Expected Result	Invalid/non-serviceable PIN codes should be rejected with validation feedback.
Actual Result	Invalid PIN codes 000000 and 111111 are accepted by the address form.
Severity	Medium
Status	Reproduced
Evidence	No screenshot captured; reproduced with 000000 and 111111

7. Evidence Appendix

Screenshots below correspond to the figure references used in the Bug Log.

Fig. 1 - WEB-001: Multiple OTP resend requests succeed without cooldown

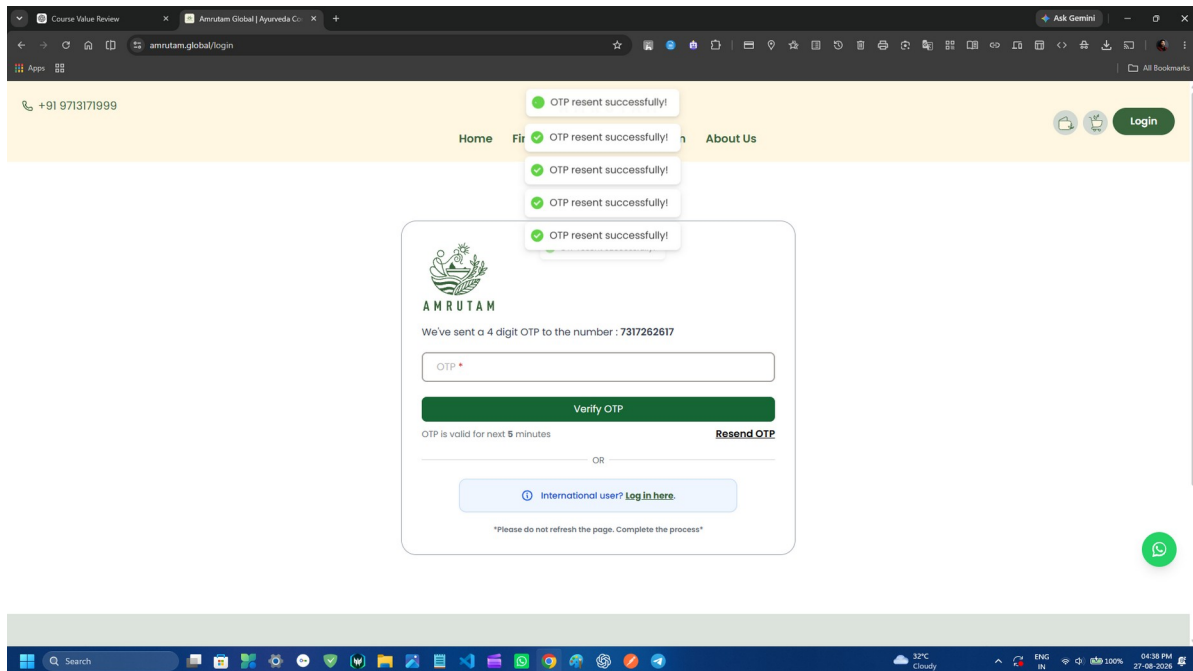

Fig. 2 - WEB-002: Incorrect grammar 'It's offers'

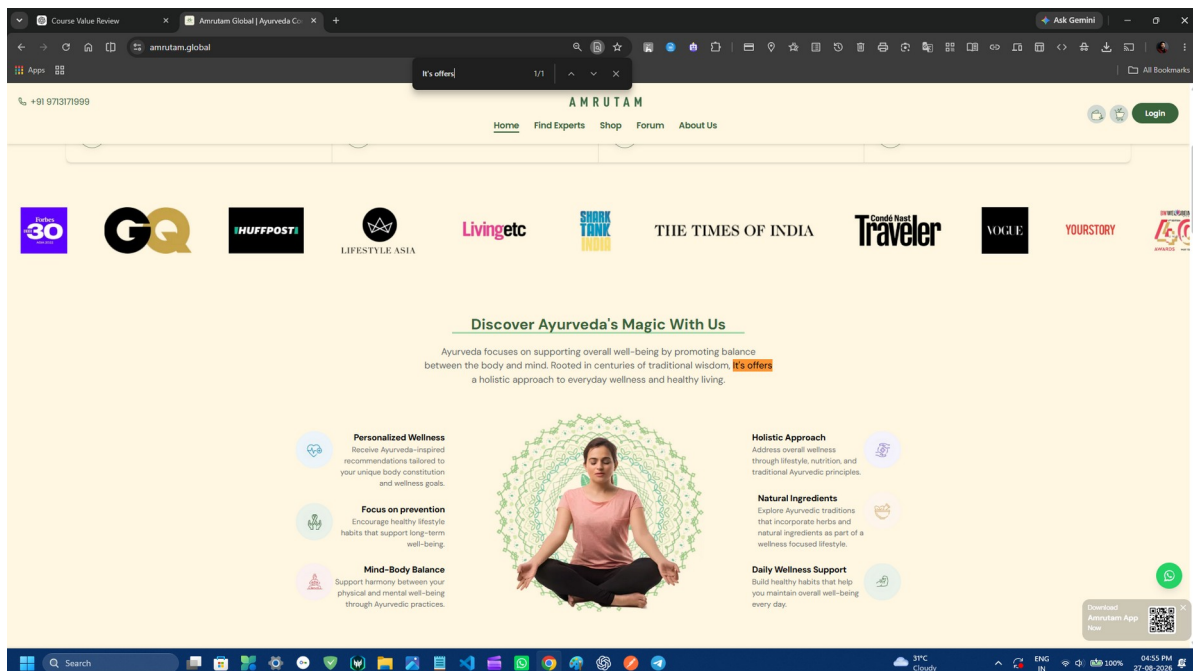

Fig. 3 - WEB-003: Incorrect wording 'Register your self'

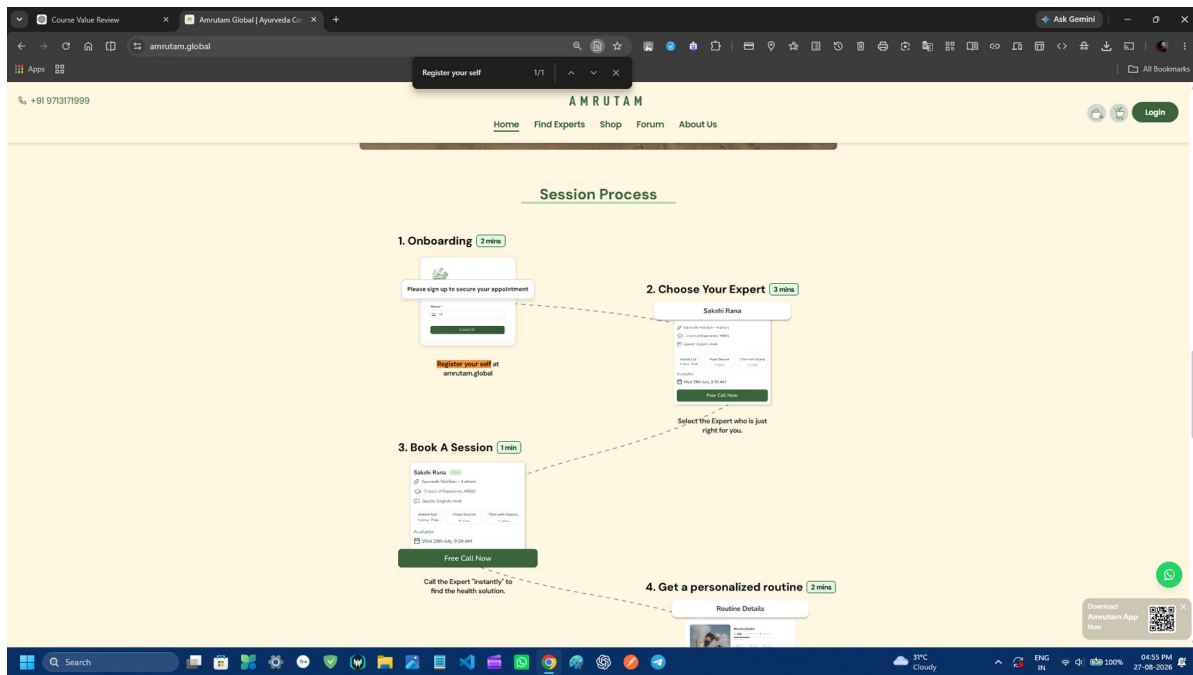

Fig. 4 - WEB-004: Spelling error 'untill'

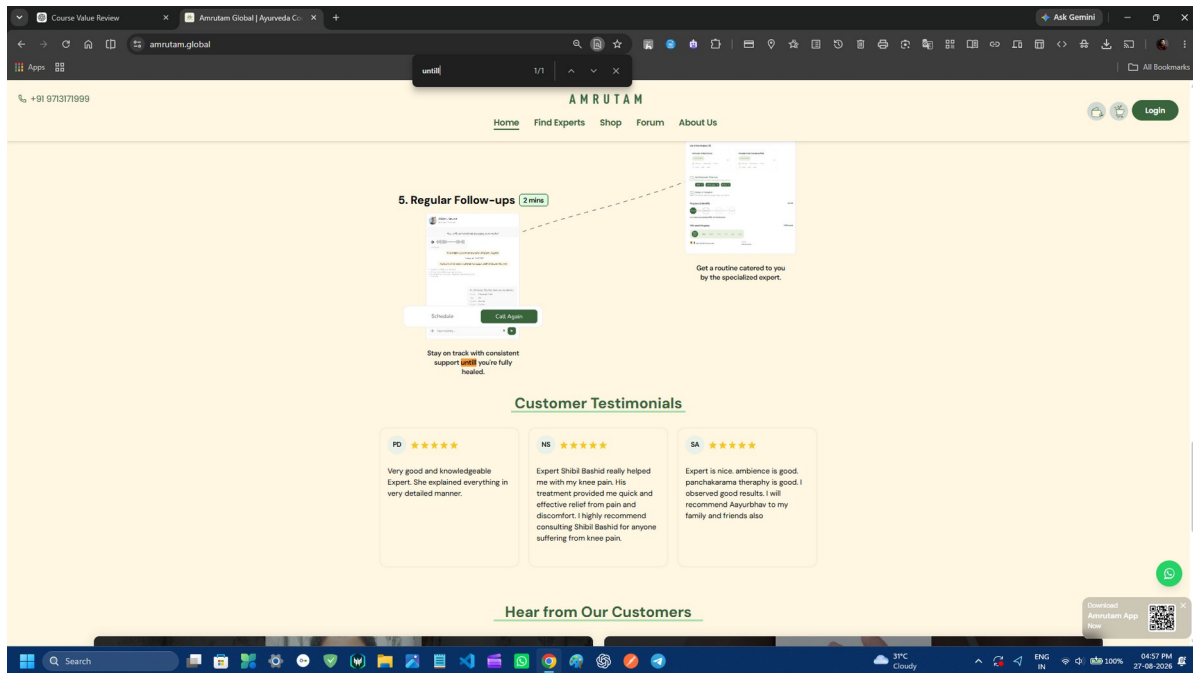

Fig. 5 - WEB-005: Numeric-only values accepted in name fields

The screenshot shows the 'Personal & Contact Details' section of the Amrutam profile. The 'First Name' field contains '4545454545' and the 'Last Name' field contains 'Awasthi'. The 'Email' field contains 'nikhilawasthi@' and is highlighted with a red border and a red error message: '*Invalid email address'. Other fields include 'Phone' (+91 73172 62617), 'Date of Birth' (2026-08-06), 'Country' (American Samoa), 'Height (cm)' (167), and 'Weight (kg)' (80). A 'Save' button is at the bottom.

8. Android Evidence

Fig. 7A - MOB-001: Invalid query provides no zero-results message

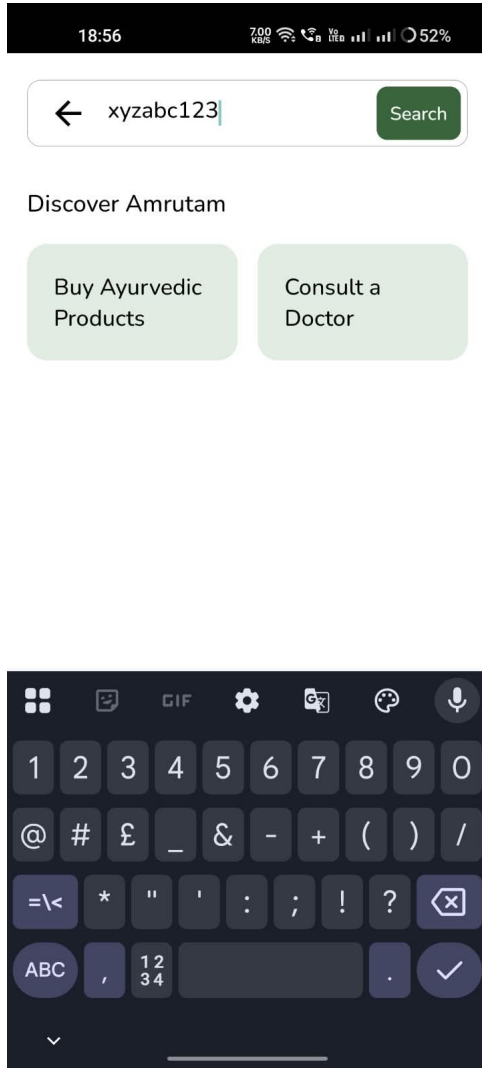

Fig. 8 - MOB-002: Latest comment shows 1 like while previous own comments show 0

Fig. 7B - MOB-001: Valid 'Kuntal care' query returns matching products

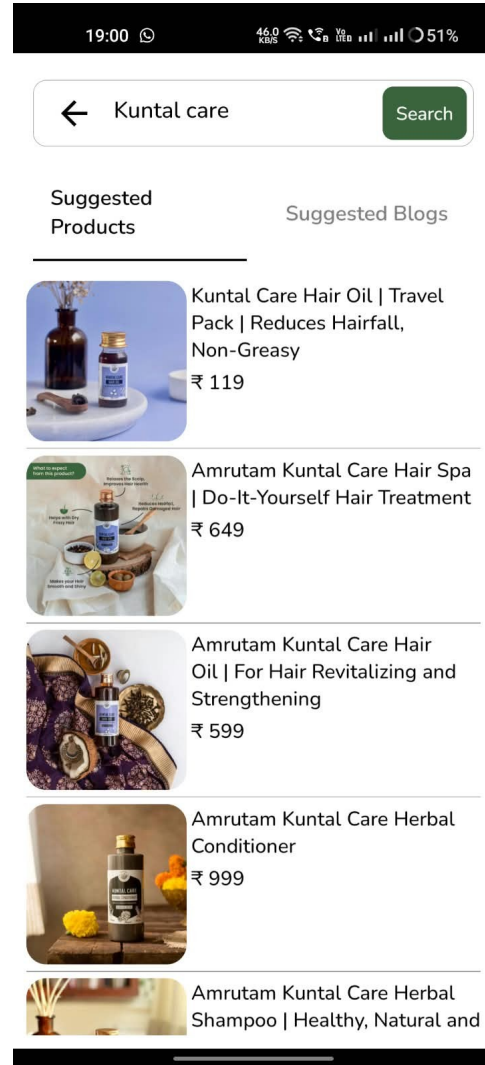

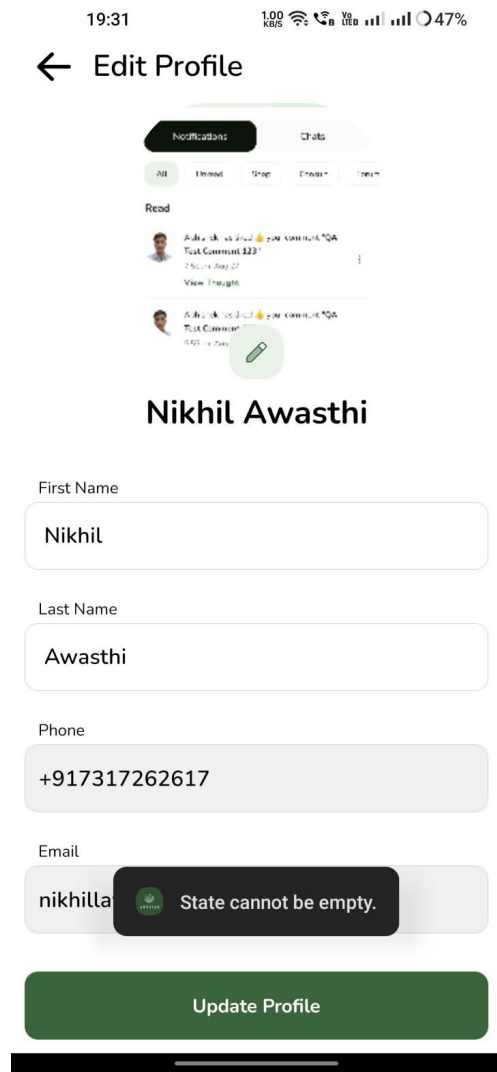

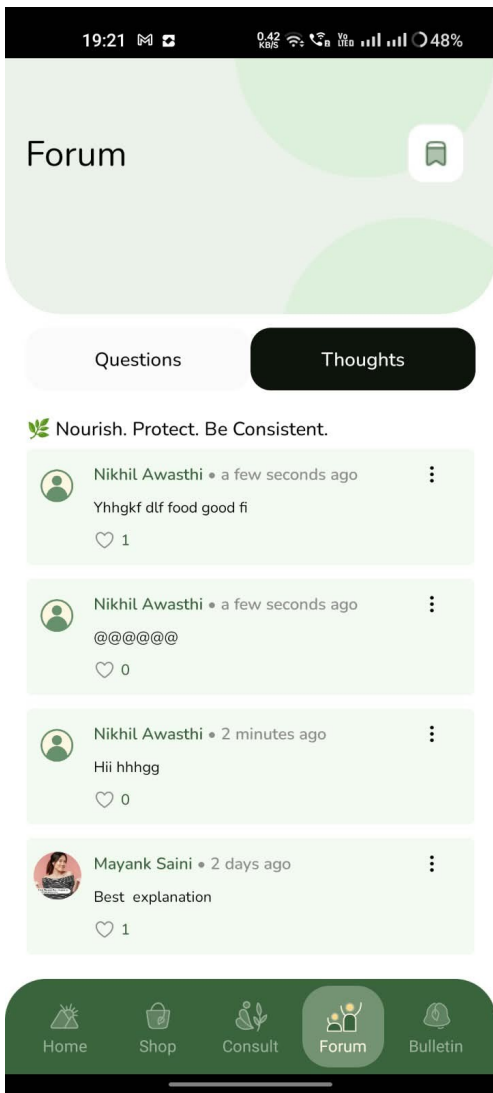

Fig. 9 - MOB-004: 'State cannot be empty' error with no State field

Evidence note: MOB-003 and MOB-005 were reproduced during testing but no screenshot was captured. Both are documented with exact reproduction steps in the Bug Log.

9. Submission Checklist

- ✓ Web platform tested with 6 confirmed defects.
- ✓ Android platform tested with 5 confirmed defects.
- ✓ 44 structured test cases documented in the Excel workbook.
- ✓ Bug reports include ID, platform, module, steps, expected result, actual result and severity.
- ✓ Screenshot evidence included where captured.
- ✓ No real payment transaction was performed.
